NuweJaars SMA Buffalo Visit

The Buffalo have returned to the Southern Most Tip of Africa after 350 years and now roam on a private special management area on the Agulhas Plains.

Now for the first time ever, Nuwejaars River Nature Reserve is offering small sized groups, a maximum of 12 people at one time, the unique opportunity to view our buffalo up close. Exciting viewing with unlimited photograph opportunities abound.

So call us today to book your visit of the Southern Most Tip of Africa Buffalo. Enjoy free wine tasting at

The Black Oystercatcher prior to our departure into the veldt.

ATTACKS

Known as one of the "big five" or "Black Death" in Africa, the African buffalo is widely regarded as a very dangerous animal, as it gores and kills over 200 people every year. Buffalo are sometimes reported to kill more people in Africa than any other animal, although the same claim is also made of hippos and crocodiles. Buffalo are notorious among big game hunters as very dangerous animals, with wounded animals reported to ambush and attack pursuers.
